

## MSC-600 Warning Sphere

Making all conductors visible for a long time

### Description :

Mundo Warning Spheres are extremely light and robust spheres that can be installed any diameter of cable and conductor easily.

Available as red, white, orange and yellow.

The key element of the Warning Sphere is ozone resistant material polyethylene(ABS)

### Advantages :

Weather resistant

Physical property retention after UV exposure

Colour stability

Practical toughness and rigidity

Dimensional stability

Adaptable to any diameter of cable or conductor (With rubber)

### Regulations:

ICAO

FAA

CE

### Characteristics :

<b>Material :</b>	Polyethylene(ABS)
<b>Diameter :</b>	600 mm
<b>Weight :</b>	< 4 kg
<b>Thickness :</b>	2.5 mm -+%10
<b>Color :</b>	Orange, Red, White, Yellow and dual colors
<b>Fixation :</b>	Rubbers (Stainless steel screws included)
<b>Temperature :</b>	-25°C up to +65°C
<b>Humidity :</b>	%100
<b>Wind Speed :</b>	240 Km/h
<b>Warranty :</b>	3 years
